**Outdoor Flash Photography** John Gerlach 2017-06-27 Maximizing the power of your camera's flash is difficult enough in a studio set-up, but outdoors literally presents a whole new world of challenges. John Gerlach and Barbara Eddy have taken the most asked about subject from their renowned photography workshops and turned it into this guidebook that is sure to inspire your next outdoor shoot, while also saving you time and frustration. Outdoor Flash Photography covers a range of practices

from portrait to landscape, including unique strategies that the authors have pioneered through 40 years in the field. Mastering the use of multiple flashes to freeze action is shown through one of most challenging subjects in nature, hummingbirds in flight. This book will benefit photographers of all experience levels who are eager to evolve their outdoor photography and get the most out of their equipment.

**DSLR Cinema** Kurt Lancaster 2018-02-19 The DSLR cinema revolution began over ten years ago. Professional filmmakers, students, video journalists, event video shooters, production houses, and others jumped at the opportunity to shoot cinematic images on these low budget cameras. The first edition of the book mapped the way focusing exclusively on DSLRs. This new edition shows how you can create stunning cinematic images using low budget cinema cameras, from iPhones to the C200. The author examines new cameras and new projects as filmmakers shoot action movies with the Panasonic GH5, craft personal stories with Blackmagic's Pocket Cinema Camera, make documentaries and short films with the Canon C100 Mark II, and create music videos with the 5D Mark IV. This book, like the previous edition, takes the wisdom of some of the best shooters and empowers you to create visually stunning images with low budget cinema cameras. It includes six all new case studies, as well as updated examples from short films and documentaries. This book contains the essential tools to make you a better visual storyteller. FEATURES An examination of the creative and technical choices filmmakers face—everything from why we move cameras to shooting flat in order to widen the dynamic range of cameras Case studies from documentary filmmakers, news shooters, fiction makers, a visual anthropologist, and recent film school graduates An updated list of gear for low-budget filmmakers, including a section on what to look for in the gear you need to shoot and edit your projects

**Close Up Photography in Nature** John and Barbara Gerlach 2014-07-17 Capturing the grandeur of landscapes or mood of a certain natural light is challenging but often the simple details of a texture or color evade photographers most of all. In *Close Up Photography in Nature*, best-selling authors and nature photography pros, John and Barbara Gerlach, share the tips and techniques necessary to successfully photograph the beauty all around you. The Gerlachs are celebrated teachers who understand a photographer's mind so they begin this book with a brief overview of the fundamentals before delving into some of the more advanced and unique challenges of close up photography. Topics

covered include: advanced flash techniques specific for close up shooting, as well as a discussion on focus stacking strategies and tilt-shift lenses for getting maximum depth-of-field. The Gerlachs also discuss their strategy of mixing flash with natural light when shooting close up, which opens up all sorts of photographic possibilities - opening up shadows, creating shadows, separating the subject from the background, reducing contrast between the subject and the background, improving the color rendition, shooting sharper images, and much more. This book will change the way you see the world as well as the way you share it through your work! the world through your work!

**Portraiture Unplugged** Carl Caylor 2015-06-22 Good lighting is everything in portraiture. The right light sculpts our subjects, smooths the skin, evens skin tones, and helps create the feeling of a third dimension in a two-dimensional image. The gold standard of lighting has, for the better part of a century, been produced by artificial lights (hot lights or strobes) in the studio. These sources allow for precise lighting effects on demand. However, artificial light cannot match the beauty or ambience that gorgeous natural light creates—and studio lighting can break the bank. In part 1 of this book, Carl Caylor introduces readers to a failproof method for understanding, shaping, and harnessing natural light for dazzling results that rival studio-lighting looks. Using your powers of observation, an understanding of the physics of light, and employing a couple of inexpensive tools (reflector panels to bounce light and a gobo to block light), Caylor shows you how to make the most of the sunlight for indoor and outdoor location shoots—and even studio work. You'll learn how to tweak the direction of light and manipulate lighting angles to re-create classic portrait lighting styles—short lighting, broad lighting, Rembrandt lighting, and more—that flatter and contour your subjects' facial structures to make them look their very best. In part 2 of the book, Carl provides an in-depth analysis into the techniques he used to create 60 beautiful natural-light portraits in myriad locations and circumstances, producing a wide range of portrait looks. Readers will learn how to integrate other elements that are important to building an effective portrait—including prop selection, wardrobe, composition, expression, posing, and even planning for a top-notch, contrasty black & white shot. The text in this book, along with inspirational images, will coax many readers to enjoy a “back to basics” approach that will allow them to produce technically exquisite and profoundly artful, flattering portraits that will sell themselves to clients every time.

**Creative 52** Lindsay Adler 2013-10-05 A powerful portfolio involves so much more than just a strong grasp of the technical aspects of photography—it's a complex mix of style, techniques, and intriguing ideas. Many photographers struggle to achieve a high-impact portfolio, feeling

that they lack the creative spark to invigorate them and move their work forward. Creative 52 is that spark—and your guide to a new and more creative portfolio in just one year! A remedy for that "average" portfolio, this collection of innovative projects will help portrait, wedding, and fashion photographers build a portfolio that draws the attention of editors and clients—leaving the competition behind. While other how-to books often use bland imagery simply to prove a technical point, and many fine art books are filled with beautiful imagery but contain minimal (if any) educational insights to help working photographers, this book blends both: inspiration and knowledge that you can use to create images that attract potential clients. Divided into three parts—concept, technique, and post-processing—author Lindsay Adler's 52 challenges each contain a description of the project, potential inspiration and suggestions of other artists to check out, and her own unique solution to the challenge—all to push you beyond your comfort zone to explore new ideas and approaches to your work. Includes a year's worth of weekly projects that motivate you to experiment with new concepts, techniques, and software tools like Adobe Photoshop to achieve more eye-catching images Offers the cure for "expected" imagery, showing how to produce memorable photographs that are distinct from the competition, enabling you to reach new clients Empowers you with the encouragement and expertise necessary to create spectacular images
